Math 370
Homework 2
due Tuesday February 13. at class time.
$\odot$

## Instructions

Your second assignment gives you practice with making lists and with creating tables, matrices and functions in Latex.

1. Start with the Title:
$\backslash$ title $\{$ Homework 2\}
$\backslash$ author\{Your Name\}
$\backslash$ maketitle
2. Each problem should start with "Problem \#." and then there comes the solution. One can do it as " $\{\backslash$ bf Problem 5.\} ..." or as " $\backslash$ subsection\{Problem 5.\}" ....
3. The submitted homework should contain both the printout of the output and of the code.
A. Lists: enumerate and itemize. In order to produce the list with numbered items such as
4. Snow.
5. Skis.
6. Sky.
one uses command enumerate :

$$
\backslash \text { begin }\{\text { enumerate }\} \backslash \text { item Snow. } \backslash \text { item Skis. } \backslash \text { item Sky. } \backslash e n d\{\text { enumerate }\}
$$

For a list without numbering

- Snow.
- Skis.
- Sky.
one uses the itemize command

$$
\backslash \text { begin }\{\text { itemize }\} \backslash \text { item Snow. } \backslash \text { item Skis. } \backslash \text { item Sky. } \backslash e n d\{\text { itemize }\}
$$

Remark. Lists are part of the Text mode. Any particular items may of course use the Math mode.
B. Tables: Make the following $4 \times 4$ table; pay attention to the adjustments (positions) of the columns.

| 1 | 2 | 3 | 4 |
| :--- | ---: | :---: | ---: |
| aa | bb | cc | dd |
| aaa | bbb | ccc | ddd |
| 1 | 23 | m | 456 | This table is produced by

```
\egin{tabular}
```

$\{|\operatorname{lr}| \mathrm{cr} \mid\}$
$\backslash$ hline
$1 \& 2 \& 3 \& 4 \backslash$
aa \& bb \& cc \& dd <br>
$\backslash$ hline
aaa \& bbb \& ccc \& ddd $\backslash \backslash$
$1 \& 23 \& m \& 456 \backslash$
\end\{tabular\} }

Here, The second line $\{|1 \mathrm{r}| \mathrm{c} \mathrm{r} \mid\}$ describes the columns of the table. Here"|" means a vertical line, while $l, r, c$ mean that the column is adjusted to the left, right or center. Also, $\backslash$ hline means a horizontal line.

Notice that each line of a table has to end with a double backslash sign $\backslash \backslash$ - it literally means "here the line ends".
C. Matrices: A matrix $\left(\begin{array}{cccc}1 & 3 & 5 & 7 \\ 3 & -3 & 0 & 4 \\ 2 & 0 & -2 & 0\end{array}\right)$ is produced by
\$\$
$\backslash$ left(
$\backslash$ begin\{array \}
\{cccc\}
$1 \& 3 \& 5 \& 7 \backslash$
$3 \&-3 \& 0 \& 4 \backslash$
$2 \& 0 \&-2 \& 0 \backslash$
$\backslash$ end\{array\}
$\backslash$ right) $\$ \$$
The double dollar signs are used to "display" the matrix. i.e, to center it on the page. The commands " $\backslash$ left(" and " $\backslash$ right)" produce the big parentheses.

Again, each line of a matrix( here called array), has to end with a double backslash sign $\backslash \backslash$.

Problem 1. (a) Produce a numbered list of 3 top places that you would want to visit.
(a) Produce a list of 3 best food items in the Blue Wall (or some other cafeteria). The items should not be numbered.

Problem 2. Produce the table

| 1 | 2 | 3 | 4 |
| :---: | :---: | :---: | :---: |
|  | 3 | 5 | 7 |
|  |  | 8 | 12 |
|  |  |  | 20 |

Problem 3. Produce the matrix

$$
\left[\begin{array}{lll}
a & b & c \\
A & B & C \\
\alpha & \beta & \gamma
\end{array}\right]
$$

Remark. The tables are in the Text mode, matrices are in the Math mode.
